Activities of Tarious Specialty Teams

The Cotton and Jute Team

Fead: CHEE Chaing-cheng (A)

Deputies: THE Yin-ch'u (事事所) and CHEEG Chien-ju (事) 向 (4)

idalmistration: TUIS Yin-ch'u and CHEMIG Chier-ju (首有句2)

Organization: SHEAI Fan-sung (別 新) and YAMG YE-ching (解 篇 方)

Research: KU I-ts'ang (如真海) and CHAD Pang-heng (科邦所)

Planning: CUND Pang-heng and KU I-ts ang

The general reduction in cotton production this year throughout the world, the export ban on American cotton since 8 September, and the soaring prices of Brazilian cotton have almost wiped out the cotton market. This situation has rendered the cotton import business very difficult. This team assists import concerns systematically in importing foreign cotton, taking into consideration the foreign cotton market, domestic production of cotton, and consumption by cotton mills in China.

Gurny-bag consumption centers around North China, In East China, locally manufactured gurny-bags can almost meet the demands of local consumption.

The Liquid Puel Team

Tead: III) Chil-ch'u (何前初

Secretary: W Pin-li (表就理)

Administration: K'O Chu -ch'u (河南河)

Organization: TS'AI Ch'eng-fu (茶 紙手)

Research: FAMG Chi-ch'eng (方河流)

Flanning: SU Chien-hadh () 3 ()

This team specializes in importing petroleum. Business was quite good in the past out is dull now. After many meetings among concerns belonging to this team, reparate measures are being taken to purchase petroleum through international ports where a supply exists.

The Silk and Crepe Team

Head: CHY Tsu-hsien (朱祖曆)

Deputies: KU Wen-chia (賴夫嘉) and SHEN Fu-an (泥旱事)

Secretary: CHURI Tao-lin (資料稅)

Marinistration: LI Yun-chang (李惠章), HSU Shong-chiang (森勝昌)

TAIG Kung-tu (獨公度), WAIG Chung-wei (江仲事)

Research: SUNG Par-lin (早條林)

Maison: GHOU YMan-hsiang () 7 7) and KAO Lung-um (7 7 7)

This team was under the Textile Industrial Articles Team until nember corporations increased to such an extent that it was forced to divide. The new team was inaugurated on 27 October.

The Pharmaceutical Team

Head: CHOU Had-ju (周海和)

Deputies: WU Hsi-aan (吳陽有), HU Chin-shui (胡錦水)。LO Te-ming (雖想則)

Administration: YANG Ping-ken (构版根), HUANG Hsing-tiao (黄兴涛)。 YU Hstleh-jen (游像仁), FING Lung-k'uei (烏龍车)

Personnin: LI Chteng-chi (李 水点), INEIG Wei-mien (台灣方)

10 Chao-chiene (何兆漢), T'U Hou-pin (唐標稿)

idalson: ID Chi-fang (羅季芳), KU Shen-hsiang (顯花有), LI Ten-wen

1. Tedicinal herbs are gathered in Shanghai for export.

Soncerns dealing with pharmaceuticals, exclusively or in part, must join this team and place themselves under the guidance of the state.

Pharmaceuticals must bear standard names and classifications since these
are factors favorable for export.

The Tace Team

Toad: YUW Pin-hua (所篇章)

Deputies: CHANG Kuo-hsien (張岡博) and KY Wen-sheng (顏夏至生)

Administration: PAD Mui-chung (包裹中)

Desearch: 可Chi-sheng (子寫生)

ldaison: TS'AI Ying-t'ung (蒸養桐

Becretary: SU Chien-hadin (黃建朝)

This beam has held discussions of the two following problems:

The Foreign Trade Bureau received a letter from the Lace and Abroidery union requesting limited production of woolen embroidery. Consequently, the Foreign Trade Bureau has assigned the job to this team, which will hold meetings among various concerns to solve the issue. Their unanimous opinion is that wool embroideries have been copied from patterns which came from abroad. Such patterns are all right. The wool used for embroideries has been mostly produced in China. The wool produced by the in Le (1, 1) and Shaaghai factories can be compared with British 3-3 wool. Such Chinese quality wool shall be produced on a larger scale to meet the demand. If

foreign purchasers of our wool embroideries, however, prescribe the use of 3-8 wool for the embroidery they have ordered, we will have to secure a sufficient quota of it from the 3-3 concern. We must also expand our activities in the markets of the USSR and the new democratic countries.

2. The basic prices compiled by this team have been much at variance with those of the Lace and Embroidery Union. To justify these prices, the team has, with good results, already handed in a detailed cost statement of cotton yarn gloves, including crating, customs duty, and industrial and commercial taxes for the consumption of the Foreign Trade Bureau.

The Hog Bristle Team

Hoad: CHAIG Hua-lien (张 華 聯)

Deputies: USIN Li-shih (內別 類) and YANG Kung-tu (桐 公原)

Secretaries: T'U Yen-ch'ing (屠主治) and FANG Ho-ch'in (不解板)

Tomainistration: CHANG Cholon-hong (在乳场), HUANG Tolen-hai (黄天病)

Besearch: YU Lid-chung (东覆字), CHU Wei-yang (朱維揚)

Maison: CHETT Pao-ytl (全質玉), T'AN Huai-sun (譚梯源

In mid-September, the peak quotation for Chungking bristles was JIP 5.7%, for Mankow bristles JIP 6.95, for Tientsin bristles JIP 7.82, for Shanghai bristles JIP 4.8 or 5. But from late September to the end of October there were no major export transactions. The following problems are dealt with by the China Fog Bristle Corporation and the Toreign Trade Bureau:

- 1. Since the enforcement of the export permit system by the Foreign Trade dureous, private hog-bristle entrepreneurs can send telegrams if they can produce invoices issued by the Chinese Mog Bristle Corporation as a result of an agreement between this Corporation and the Foreign Trade Bureau.
- 2. Consular invoices have been needed for hog bristles exported to the United States. Since the Chinese government has not established diplomatic relations with the U.S. and Britain, these consular invoices are not provided with the shipments.
- Te must find a way to deal with arbitration problems which arise in London and New York.
- h. Nog bristles short in weight but already exported to Britain will be made up in later shipments. From now on, the weight of shipments will be taken as the weight of the hog bristles exported.
- 5. The Chinese Communist government encourages bartering goods with foreign countries. Transshipments may be effected in India for the bartering of hog bristles.
- 6. The team will discuss the problem of crating Changhai hog bristles with a panel of persons concerned, for rectification of the supply and demand.
- 7. Igents of the China Nog Bristle Corporation will charge this corporation for any additional wires sent if shipments of hog bristles are delayed.
- 8. Agents of the China Hog Bristle Corporation will be informed early of the date of impending shipments so that they will be able to wire the import-
- The China Hog Bristle Corporation will convene its third conference on hog bristles to discuss the suggestions of the members.

CHNTRAL INTELLT CHACK AGENCY

the following are wints for discussion by the Control Team:

- 1. The Foreign Trade Bureau is rectifying registration of exporters and insporters, encouraging specialty trade, and preparing to issue business lineares.
- 2. The government considers the specialty trades as the link between private enterprises and state-operated industries. Private entrepreneurs are guaranteed legitimate profits.
- 3. Since the readjustment of the exchange rate from JIP 35,000 to JIP 31,000 to one U.S. dollar, the government has collected extensive information from traders concerning their losses as reference data for future measures.
- . The government lays much emphasis on the barter system.

Other problems:

- 1. To establish a white hog bristle works in Chungking.
- 2. To abolish the unified purchase of hog bristles in Manchuria.
- 3. Outstanding payments of victory bonds must be met. Only one member concern of this team has yet failed to meet the outstanding payment.
- 4. Invoices do not need the seal of this team.
- 5. Hog bristles are granted priority service in railway transportation.

Tiaison: WANG Hsiu-t'ing (五春度)

In fast China, only one egg processing factory is in operation. The following three difficulties exist for marketing egg products:

- To Charge for indirect shipment.
- 2. Turnover of capital in egg processing factories.

3. The cost of eggs and labor is higher than in North China and transshipment charges are also high. The state-operated China Ngg Products Corporation was asked to aid. On the grounds that the egg exporting business is dull and the cost of eggs in China is high, if the China Ngg Products Corporation subsidizes this deal, some of the nation's capital will be frozen. The egg exporting business centers around Tientsin. With reduced production in eggs during this autumn, the price has increased fifty percent. But the comparatively inactive egg products business in East China will not discourage the dealers who have effected contact with their fellow-traders in Tientsin for export transshipment. British egg products importers insist on FOB Hong Kong, and the eggs exported will be received at Hong Norg with certificates indicating that the eggs have been examined and approved. North China exporters have accepted this British condition.

This team suggests that:

- a. Either our North China exporters ship their goods to Hong Kong, where the analysis and foreign exchange allotnent will be dealt with, or
- b. Our exporters should try their best to make our shipment FOB a Chinese ports

dermany also imports Chinese eggs and telegrams have already been sent us for goods. But various conditions were attached to the telegrams, and negotiations are in progress.

Activities of Exported Items Last Week

- l. Silk and Crope
- A. Raw Silk

The production for this year is about 7,000 picul, the same as last year. But the quality this year is not as good as last year because it drizzled for many days while the occoms were being treated. Besides, farmers receive silk themselves at the time when the autumn occoms were fresh and highly valued. Therefore, the production of silk filatures has been affected this year by the silk-reeling farmers.

East week the quotations were:

Filature white silk: 30 bales, sold at 41 sl2 dk per pound, including cost, insurance, and freight CIF London.

Filature yellow silk: 15 bules sold at 11 s3 d6 per pound CHF Bombay.

Pongeo: 50 115-pound boxes sold CIF Singapore.

Japanese silk filatures have increased production. From Tokohama and Toke only, 12,167 bules were exported in September. This was an increase of 2,566 bales over those exported in August. These exported bales were mostly destined for the U₀S. and Switzerland. Before world war If, the Japanese silk industry competed sharply with Chinese silk industry. Since then, Japanese silk has been displacing Chinese silk in foreign markets. If we Chinese do not catch up promptly with the Japanese, it will be unfavorable for the future of China's silk industry

B. Crepe

Rah3h bolts were sold lest week as follows:

CONFIDENT IAL

Approved For Release 2001/03/05: CIA-RDP82-00457R007300600002-7

Cos spercette crepe CIF Hong Kong at HK (2.95 per gard.

Star principle crope CIF Long Kong at DK \$4.45 per yard.

Las o - rerrette arece rod Shanghai at III Qu.00 per yard.

Ma Tes

Business is dell for foreign markets. Telegrams are munerous but offer has than the floor prices.

Unity Town AI (*) (Trummee) tea is stockylled for esport, being more in the stand than departure and Taiwanese tea in foreign markets. In North Africa, Japanese teammee tea is not so welcome because of its quality. According to the accordance for the first and the size of Chinese tea bricks was dislicated in shipments as command with specimens for export and there were shortages of three to five percent in shipments. From now on, the Foreign Trade Sureau and the Tea Export Specialty Team will see to it that the special calcons and quantity of slipments of tea for abroad tally with the prescriptions.

UTE. Far and Feathers

- In leacets are not in demand abroad.
- 2. Gearge wood still common be amported.
- 3. Impain hely is in demand but the price is not high enough for many transactions.
- h. Tolegrams from abroad offer too low prices for feathers, of which there are togetherent samplies in Giana this year.
- 5. Gest far is in season right now, but as domestic consumption accounts for easy about thirty percent and the issue of export permits is being suspended, traders tope that the poverment will relax its control for export. The Trade Control Darsan is considering this matters.

IV. Embroaderies

Fun Na Sum (ANA) 1) of Glassing (120-3h, 30-00) had a higher bid but small subdy. Bed sheets 72" by 90" at 2.45 ex-godown are under negotiation in Shanghai. Chocheted places are in demand for export but the subgly of raw material is not sufficient. The Entroidery Team is going to hold a neeting manny traders along this line and will ask the Trade Control Eureau for applications if necessary.

Vs Pagperning

The Peppercent Export specialty Team is determined to call upon all peppercent producers in an effort to effect joint marketing to counteract the slashing of prices by importers abroad. Two months ago the banks suspended their loans to peppercent dealers, so the peppercent producers and exporters cannot seld their joeds. And war clouds abroad have been raising the price of peppercents foreign importers try to secure more goods, including peppercent. Therefore, in the past week the market situation for peppercent was quite good.

CONFIDENTIAL

CENTRAL INTELLIGENCE AGENCY

VI. Cure Oil

The orice of tung oil is rising. Tune oil has to be transshipped via Shang had and is not available yet for directing. The Lard and Dil Export openialty Team expects to establish a transshipment station at Unnhow for transshipments for Tong Tong Tong along the Canton-Tankow Railway. This measure has been approved by the Trade Department of the Gentral-South Cilitary and Political Commission. The problems of tax levies, procurement, and money exchange are still under discussion.

VII. Ceralia

The situation has improved compared with last week. Owing to difficulties of transportation and the fact that the banks have suspended their loans to the packers of cereals, however, the export situation will not improve within a short period.

Lest week, raw shell—less peanuts were under negotiation to some extent for export via Tsingtae.

Furly in the Korean war, foreign importers rushed to purchase goods at high prices. In the past two months, this mood has subsided because of saturation in capacity. Consequently, tea, menthal crystals, and tung oil are valued at prices below those agreed upon among the Chinese exporters. But there are some irregular exporters, especially of foreign nationalities, who indulge in exporting their goods according to the prices agreed upon with foreign importers, who purchase these goods at prices lower than those agreed upon among Chinese exporters. But these foreign importers will make up what these exporters have lost by compensation payment. The Trade Control Bureau has now focused its attention on such irregularities and is planning steps to but a them in order to procerve foreign exchance for China and to protect the log teams interests of the exporters.
